Raising Lantern lighting program

studio Lawrence

Studio Lawrence proudly presents the most extensive, flexible and effortless lighting system to date. The Raising Lantern comprises a series of stacked cylindrical shades, creating arresting and sculptural compositions with endless possibilities. The modular stackable system of 10 different shades can create dramatic floor lamps or pendant lights, ranging in height from 80cm to a towering 3.4m.

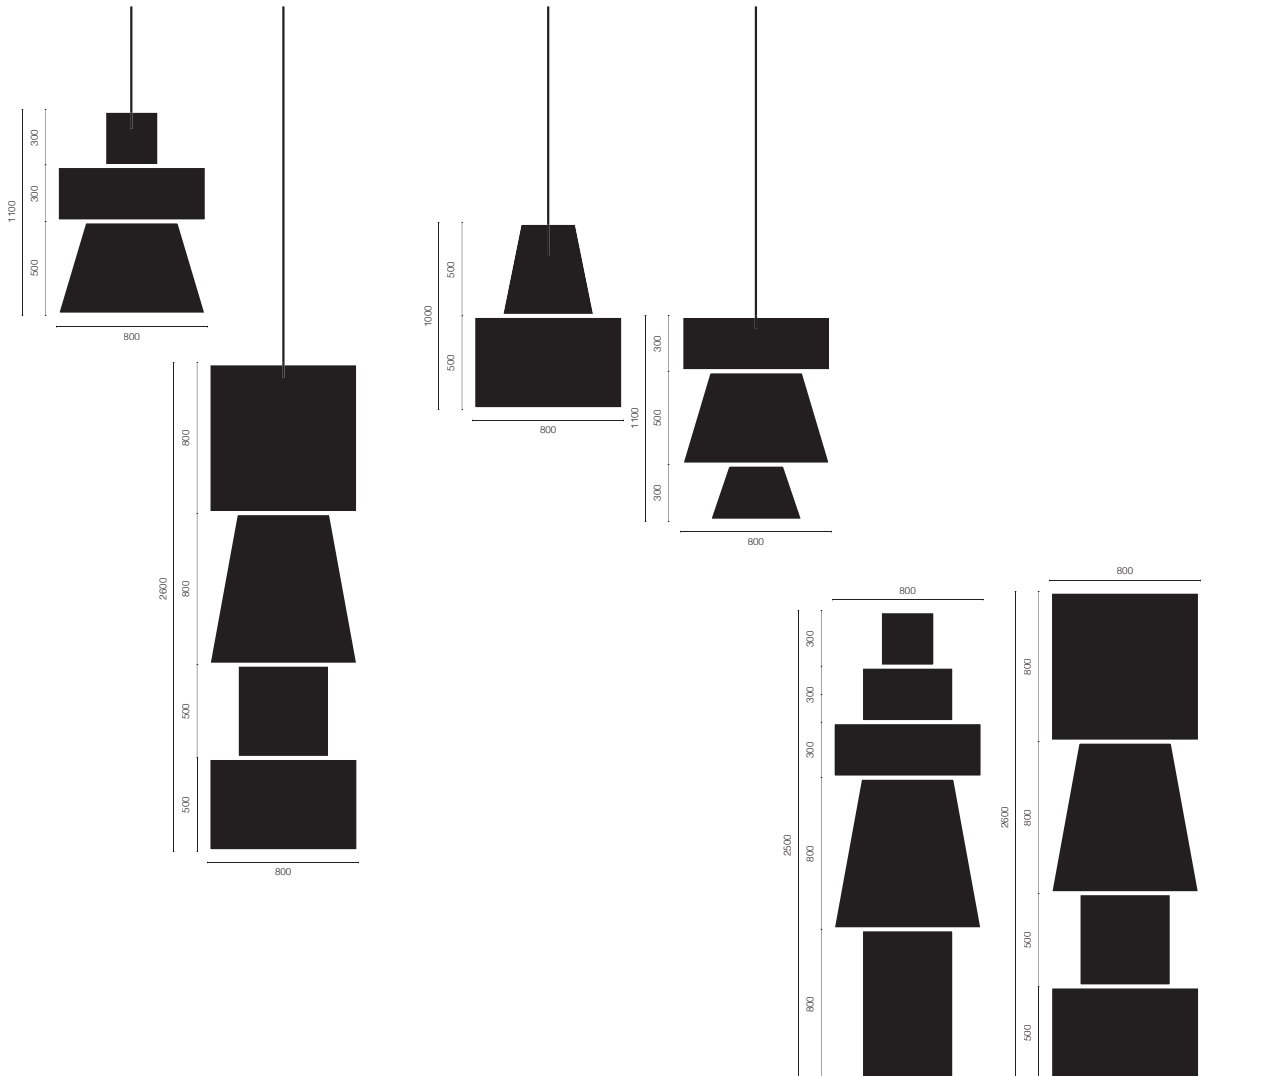

With limitless custom compositions available, Bart and Patrick have devised 389 Studio Lawrence Raising Lantern designs, each of which can become a pendant light and 362 of which can be a floor lamp, illustrating the sheer scale of possibility this system can offer.

Raising Lanterns are popping up all over the globe. Being extremely efficient and environmentally-friendly to transport, the Raising Lantern appears at your door as a flat-pack. The Raising Lantern can then be easily assembled and the sophisticated design enables large, dramatic volumes to be created instantly.

Being highly sociable, Raising Lanterns work best in groups. The standing lanterns can form towering statues of light while the hanging lanterns create clouds of glowing shapes. While imposing in their size and volume, the lanterns are also warm and welcoming as they radiate soft light. Their sculptural shapes both divide and define the space around them, solid and soothing forms, ideal when clustered in reception and waiting rooms, or hung above desks or conference room tables. At home, the smaller pendant designs can create a striking focal point above a dining table, while a single floor lamp can transform in size and composition to work in a variety of spaces.

Material: PP (polypropylene) shades, acrylic diffusers on an aluminium frame.
Colour: White, other colours on request.
Fittings: E27 lampfittings, powercord & plug.
Lightbulbs: NOT Included.
